**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

Ive been a happy customer of Sonic.net for the past 6+ years, initially as an ADSL customer and then as a gigabit fiber optic customer. I know it is **imperative** for broadband to remain competitive, particularly in the crazy San Francisco market. Virtually everyone I know loves & supports Sonictheir service is unmatched, and Ive had every single broadband service offered in SF over many years... beginning with Metricim and Sprint Broadband in the late 90s/early 2000s.

Ive actually been paying for internet connectivity in San Francisco since 1990, beginning with AOL.

SONIC is far and away the best ISP **ever** to operate in San Francisco. Please support Bridge 2 Broadband... do not let the Telco (AT&T) deny Sonic access to unbundled network elements. This is crucial to maintaining competition! Thank you so much for your consideration. We mst allow smaller ISPs to compete! Sincerely yours,

Rebecca Randall
